SUMMARY

2025 Computer Science Graduate and Full Stack Developer who ships and deploys complete products, not just code exercises. Built and deployed a production MERN marketplace (live at [gawandekrushikendra.store](#)) with end-to-end auth, REST APIs, and MongoDB data modeling, alongside frontend projects focused on clean, responsive UI design. Comfortable owning a feature from database schema to polished UI.

PROJECTS

Agriculture Marketplace Platform — MERN Stack [gawandekrushikendra.store](#) | [GitHub](#)

- Built and deployed a full-stack marketplace connecting farmers and buyers, live in production on a custom domain with backend, database, and DNS fully configured.
- Designed and implemented user authentication (regular and admin roles) and REST APIs for product and user management using Express.js and MongoDB.
- Built a responsive React.js and Tailwind CSS frontend for product listing, browsing, and account management.
- Built an admin panel for product management with stock and inventory alerts, and integrated a payment system into the checkout flow.

Cafe Landing Page [cafe-hide-out](#)

- Built a multi-section cafe website (React.js, Tailwind CSS) covering story, categorized menu, gallery, testimonials, and reservation call-to-action.
- Structured a data-driven menu system with 40+ items across categories (pizzas, burgers, beverages, mocktails), including pricing and veg/non-veg tagging.
- Designed a cohesive visual identity (typography, color palette, iconography) with a fully responsive, mobile-first layout, built without a UI component library.
